

KARNE RUTHVIK

Data Analyst

6281428962 ruthvikkarne11@gmail.com in/karne-ruthvik Secunderabad, Telangana, India

SUMMARY

A strong passion for data science and a commitment to leveraging analytical skills to drive impactful insights is demonstrated. Experience in developing predictive models and creating intuitive dashboards indicates a readiness to contribute meaningfully within a collaborative team environment. Enthusiasm for tackling real-world projects aligns with a desire to refine technical proficiencies in Python and data visualization, supporting informed decision-making and enhancing organizational success.

EDUCATION

Bachelor of Technology
Anurag University

Venkatapur, Ghatkesar, Hyderabad, Telangana, India
08/2019 - 05/2023

KEY ACHIEVEMENTS

HR Analytics and Health Analytics Projects

Developed predictive models that enhanced employee turnover forecasting by 15% while working on HR Analytics and created intuitive Power BI dashboards showcasing impactful insights

SKILLS

EDA, GitHub, Matplotlib, Microsoft Excel, Microsoft Power BI, NumPy, Pandas, Python, Scikit-Learn, SQL, Tableau, Gmail, Matplotlib

TRAINING / COURSES

BCG-Data Science Job Simulation

Data Cleaning, Analysis, Modeling, Python, Data Visualization, Communication, Problem-solving, Business Acumen, Statistics, Interpretation

PROJECTS

HR Analytics

05/2025 - 05/2025

HR Analytics project utilizing SQL and Python for employee data analysis and predictive modeling

- Examined employee data from over five thousand records to identify trends in attrition, performance, and job satisfaction
- Utilized SQL and Python to extract, clean, and analyze large HR datasets with high accuracy
- Created predictive models that enhanced employee turnover forecasting by fifteen percent, supporting retention strategies
- Designed interactive Power BI dashboards for HR teams to visualize critical workforce insights
- Enabled data-driven decision-making to improve workforce planning and reduce attrition by ten percent
- Formulated strategic recommendations that increased talent acquisition efficiency by twelve percent

Health and Sleep Analytics

05/2025 - 05/2025

Health and Sleep Analytics project leveraging data from wearable devices

- Analyzed wearable device data to reveal key sleep and health patterns
- Discovered links between sleep quality, activity, and wellness metrics
- Leveraged Python tools for efficient data cleaning, visualization, and insight generation
- Provided actionable recommendations to improve sleep and overall health
- Created dashboards and reports that guided informed health decisions
- Identified critical factors affecting sleep to tailor personalized wellness strategies
